Workshop fee: N300, 000 per Participant

For online: Delivery via Zoom

Online course fee: N250, 000 per Participant

Available for In-plant Training

**700 USD for foreign
Participants**

Program Overview:

In today's healthcare environment, efficient supply chain and logistics management are crucial for ensuring the timely delivery of medical supplies, optimizing costs, and enhancing patient care. This specialized training course is designed to equip hospital managers with essential knowledge and skills to effectively manage supply chain operations within healthcare settings.

This course covers the latest essential practices in forecasting, planning, procurement, transportation, warehousing and logistics. It also covers the Supply Chain Operations Reference (SCOR) framework for continuous performance improvement across the supply chain and how to apply it for hospitals.

At the course, participants will be equipped with the knowledge and skills necessary to effectively manage supply chain and logistics operations in healthcare settings. They will be better prepared to address challenges, optimize processes, and contribute to overall organizational success through efficient supply chain management.

For Whom:

This program is designed for Hospital managers, administrators, and healthcare professionals involved in operations management, procurement, logistics, and supply chain roles. This course is also beneficial for professionals looking to transition into healthcare SCM or enhance their existing knowledge in this specialized field.

Learning Objectives:

At the end of the program, participants will be able to:

- explain the fundamentals of supply chain management (SCM) in healthcare.
- explore the role of logistics and distribution in hospital operations.
- design strategies for inventory management and procurement specific to healthcare needs.
- analyze case studies and best practices in healthcare supply chain management
- gain insights into regulatory compliance and quality assurance in SCM for hospitals.
- develop skills to optimize supply chain processes and reduce operational costs.
- acquire skills for effective decision-making related to supply chain issues in healthcare.

Course Outline:
