**800 USD for foreign
Participants**

Program overview:

This comprehensive course is designed for professionals involved in managing, overseeing, or collaborating with contractors in the oil and gas industry. It focuses on the critical aspects of safety management to ensure that contractors meet the industry's stringent safety standards and regulations.

It will equip participants with the knowledge and skills needed to enhance contractor safety management practices, ensuring safer operations and compliance within the oil and gas industry.

For whom:

This course is designed for safety managers, project managers, operations supervisors, and other professionals involved in managing contractor safety in the oil and gas industry.

Learning objectives:

At the end of the program, participants will be able to:

- explain the fundamental principles of safety management and their application to contractor operations.
- develop and implement effective safety management systems tailored to contractor activities.
- assess and mitigate safety risks associated with contractor work in the oil and gas sector.
- gain insights into regulatory requirements and best practices for contractor safety management.
- acquire skills in safety performance monitoring, reporting, and continuous improvement.

Course Outline:

Day 1: Contractor Safety Management: An Overview

- Overview of the importance of contractor safety management in the oil and gas industry.

Principles of Safety Management:

- Core principles and concepts of safety management.
- Safety culture and its impact on contractor operations.

Regulatory Framework and Compliance:

- Key regulations and standards (e.g., OSHA, API, ISO) affecting contractor safety.
- Understanding legal and organizational compliance requirements.
- Documentation and record-keeping practices.
- Case studies on regulatory compliance failures and lessons learned.

Day 2: Developing and Implementing Safety Management Systems

Safety Management Systems (SMS):

- Components of an effective safety management system.
- Developing and integrating safety management plans for contractors.

Contractor Safety Management Plans:

- Crafting detailed safety management plans.
