Online course fee: N250, 000 per Participant

Available for In-plant Training

**700 USD for foreign
Participants**

Program overview:

Logistics is the management of the flow of things between the point of origin and the point of consumption in order to meet requirements of customers or corporations. The resources managed in logistics can include physical items such as food, materials, animals, equipment, and liquids; as well as intangible items, such as time and information. The logistics of physical items usually involves the integration of information flow, materials handling, production, packaging, inventory, transportation, warehousing and often security.

At the completion of this program participants will have a detailed knowledge of various kinds of a distribution system, cost associated with logistics operation, strategies to reduce this cost, when to make and when to buy, etc.

For whom:

This program is designed for Logistics professionals at all levels of the organization. In addition, this course is ideal for those seeking to complement their supply chain and logistics experience with the latest knowledge in the field in preparation for assuming a higher position at their organization.

Learning objectives:

At the end of the course, participants will be able to:

- recognize modern supply chain and logistics trends as a basis for sustainable performance;
- employ qualitative and quantitative material forecasting techniques for a streamlined logistical operation;
- develop go-to-market strategies for different product categories based on associated supply risk and financial impact of each;
- describe role of transportation in logistics and identify opportunities for operational improvement;
- identify the role of warehousing, focusing on operations and performance optimization; and
- apply Supply Chain Operations Reference (SCOR) framework to manage strategic, operational and tactical facets of logistics.
